

MAGSEAM[®]

MODULAR SEAMLESS WALLING

MAGSEAM®

EXCLUSIVE PRODUCTION - PATENTED INDUSTRIAL DESIGN - UNIQUE MODULAR SOLUTION

ENVISION THE FUTURE OF YOUR GARAGE

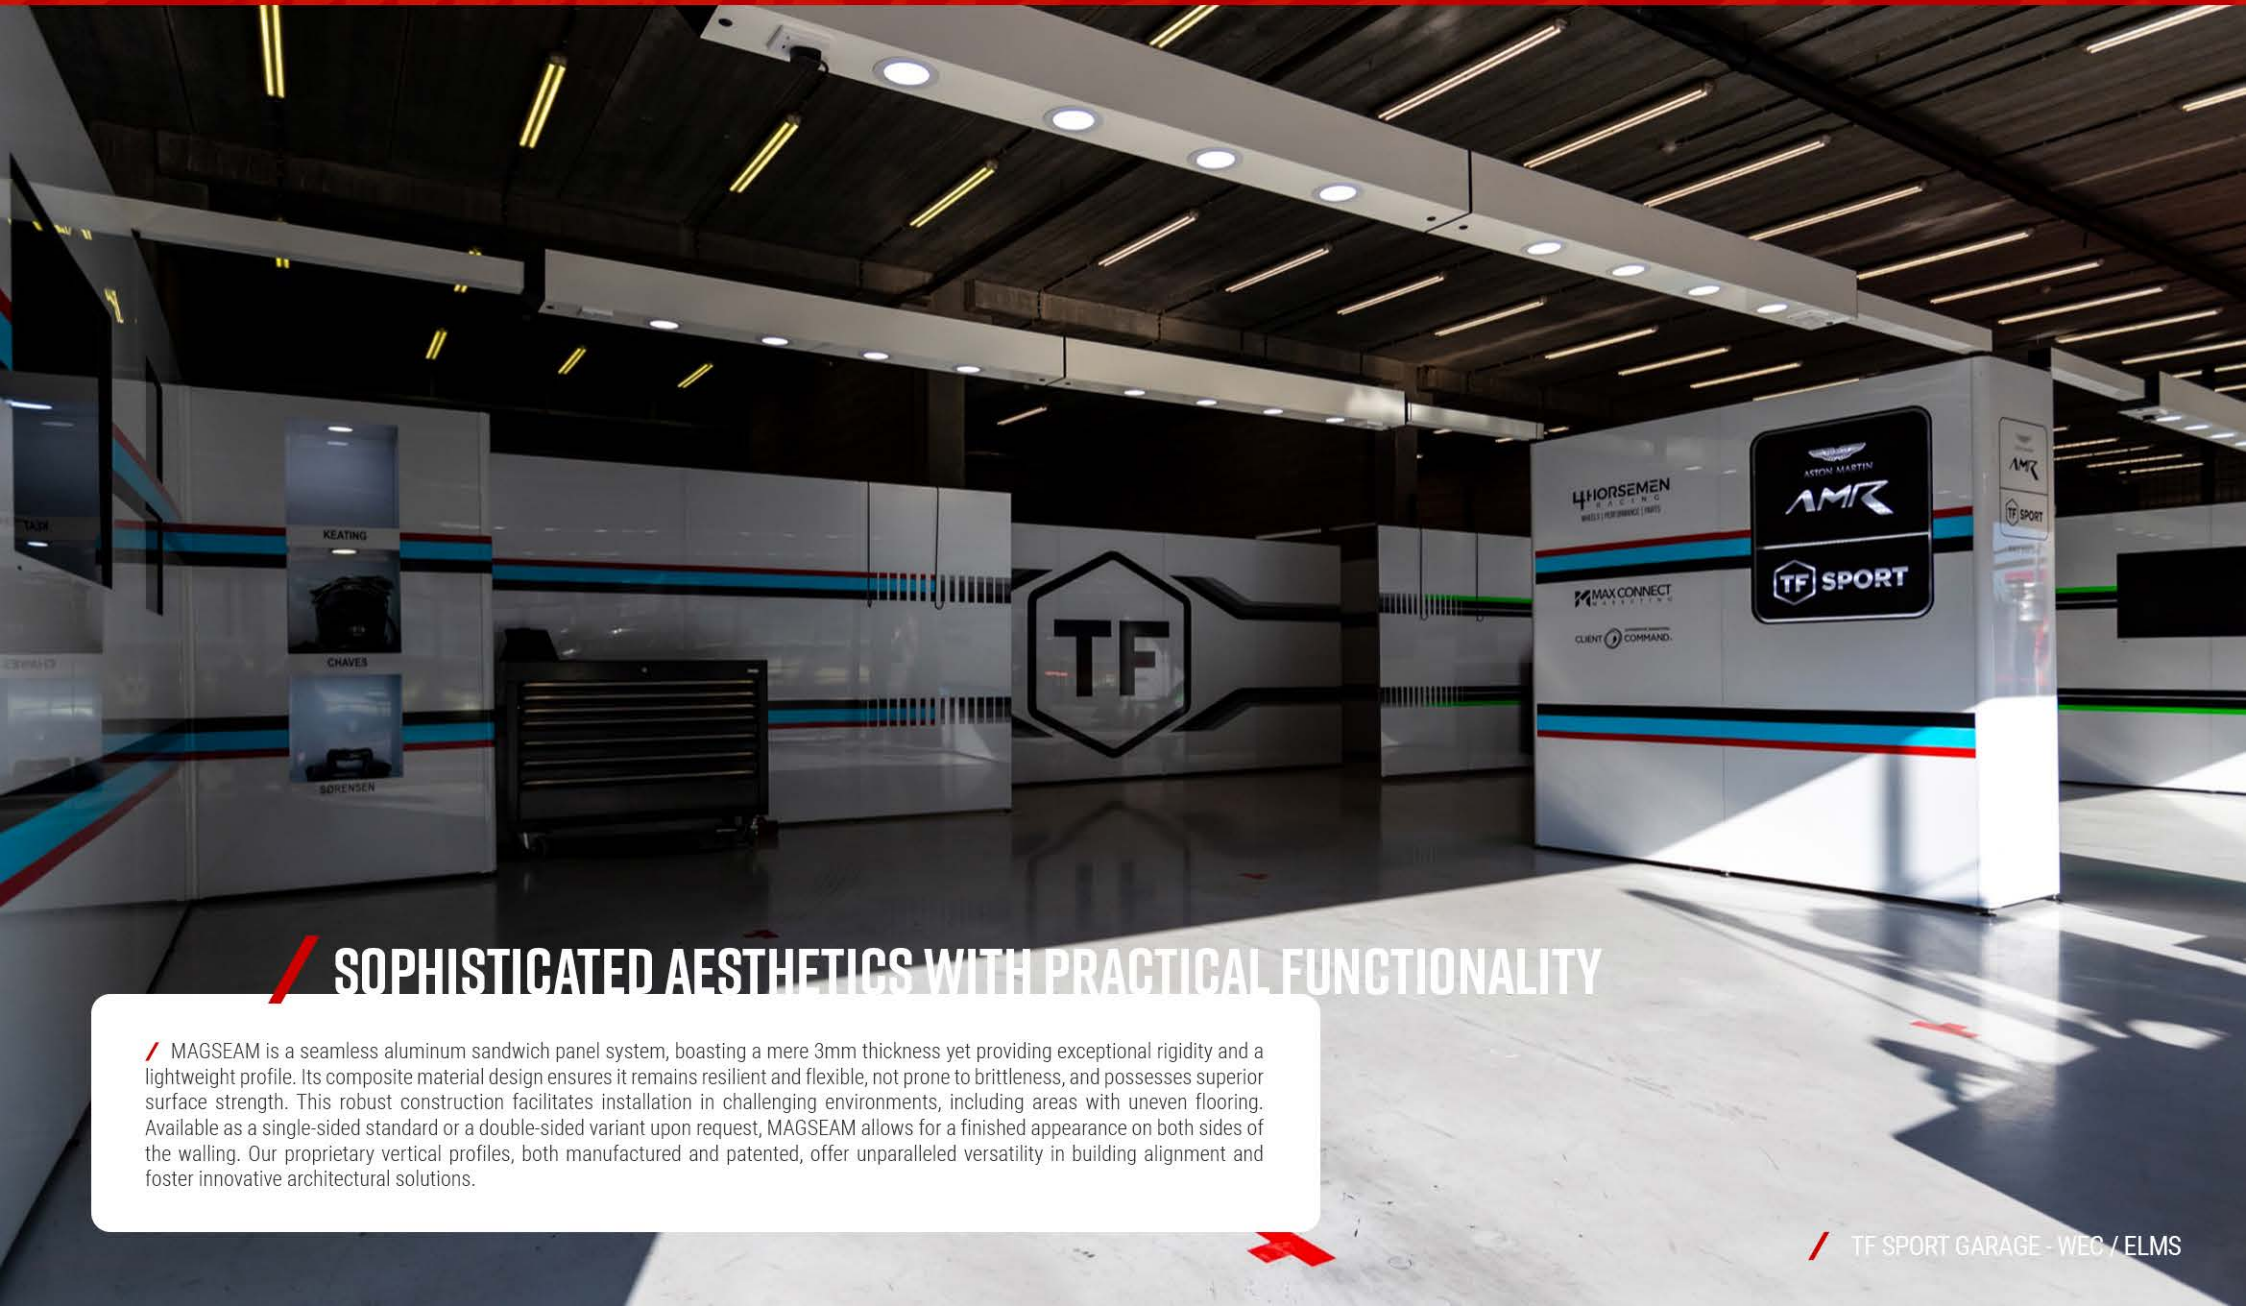

As a premier manufacturer, we specialize in professional seamless garage wall systems tailored for motorsport applications. MAGSEAM walls represent a straightforward construction system comprising aluminum beams and columns, onto which aluminum sandwich panels are effortlessly affixed via a magnetic system. This design allows for the rapid and efficient construction of expansive areas. Our modular beam system accommodates various-sized television screens, helmet boxes, LED and 3D logos, tables, doors, and technical data stations. We produce our own unique and patented aluminum columns - profiles. The construction time is minimized, the system is sophisticatedly mechanically leveled, and the result is captivating. We deliver a top-tier product at a fair price.

Another vital aspect is the transportation of the MAGSEAM system using our specially manufactured flight case. All components and accessories fit into one box, offering an "all-in-one" solution. Overall, the system boasts the lowest possible weight, thus effectively reducing transportation costs. We strive for high sustainability in the project.

All our MAGSEAM wall products are crafted from the finest materials available and designed to provide years of trouble-free use. The MAGSEAM brand holds the EUIPO trademark #018065394, ensuring quality and innovation in every piece.

SOPHISTICATED AESTHETICS WITH PRACTICAL FUNCTIONALITY

✓ MAGSEAM is a seamless aluminum sandwich panel system, boasting a mere 3mm thickness yet providing exceptional rigidity and a lightweight profile. Its composite material design ensures it remains resilient and flexible, not prone to brittleness, and possesses superior surface strength. This robust construction facilitates installation in challenging environments, including areas with uneven flooring. Available as a single-sided standard or a double-sided variant upon request, MAGSEAM allows for a finished appearance on both sides of the walling. Our proprietary vertical profiles, both manufactured and patented, offer unparalleled versatility in building alignment and foster innovative architectural solutions.

/ WE ADD USER-REQUESTED FEATURES

- HELMET BOXES, including lighting and ventilation options.
- TV / MONITORS areas
- WINDOWS areas
- BOX LOGO LIGHT logos
- LOGO LIGHTED 3D logos with contour
- Work and breakout TABLES
- SLIDING DOOR to the system
- END LED profiles with choice of LED colour
- Custom applications according to requirements

/ Our END LED illumination system offers versatile lighting options to manage access and enhance team branding. Select a welcoming green light to signal open entry for the public or guests, or a prohibitive red to indicate restricted access. Alternatively, align with your team's identity by choosing LEDs in your team's colors, with the ability to set any hue from the RGB spectrum for a cohesive and spirited display. This feature not only serves a functional purpose but also elevates the aesthetic appeal of your space.

Example of accessories - POWERHOOD lighting equipment with truss construction and covering.

POWERHOOD S200

The Special POWERHOOD S200 is made for lighting the interior of racing-car garages, lighting over the car itself, motorbike or in the workshops. Light construction, high luminosity together with a practical and elegant design are great features of this product. The POWERHOOD is also possible to be fitted with air distribution, following the customer's request and specifications. We offer two models in 16AMP and 32 AMP versions. Dimensions are 2000x1000x140mm. All models have automatic connection selection from 100 – 240V. Power control is set by selecting 30-70 or 100% power. The POWERHOOD can be supplied with air distribution for your pneumatic tools (up to 10bar), ETHERNET distribution or other accessories on request.
